Safety is paramount with hands-off operation during cutting. Designed for one-person operation, it handles sheets up to 50" x 10' x 2" thick.

The SpeedWorx system empowers users with an intuitive touchscreen interface and integrated software, enabling seamless one-touch part selection, highly optimized cuts, and minimal waste through advanced optimization and manual scrap utilization, all while effortlessly integrating with major platforms for efficient, one-off cutting.

An optional integrated printer solution streamlines part labeling.
